

JLC Waste Management

COVID-19 Policy

JLC Waste Management would like to reassure our clients that we are continuing to operate, providing it's safe to our customers and staff.

All of our rubbish collections have continued as normal, but we have adopted a few changes and policies.

We are continuing to monitor the latest advice from the UK Government, Public Health England and other sources and will update this policy in accordance with the latest advice.

- Waste should be placed outside wherever it is possible to do so to ensure that there is no close human interaction.
- Where this is not possible waste should be contained away from other people.
- Our staff are taking precautions and only attending work if they are fit to do so.
- We will not hand over mobile phones or documentation and will sign these on your behalf.
- Hand sanitiser, masks and gloves are provided and used by our staff.
- Contactless payment options.
- Waste from homes with possible cases of COVID-19 and waste from cleaning of areas where possible cases have been identified should be double bagged, using a strong rubbish bag. These bags should be tied and stored for at least 72 hours.

PLEASE NOTE: We are not able to collect if you are exhibiting symptoms or have been exposed to the virus or are isolating due to potential exposure.

Email any questions to you may have to info@jlcwastemanagement.com
